Dear Darko,

It is with great pleasure that I officially confirm your appointment to the IRF's very first Pararafting Committee.

We are delighted with the caliber of people who have stepped forward for this committee (see below list of committee members). This is something that has long been on the to-do list for the IRF, the lack of man-power hours to develop it being all that has been holding it back.

The IRF would like to see a number of Pararafting events being held around the world in 2021 and so the primary aim right now is to get the Rules and Code to a state where event organisers have clear outlines of what needs to be done. At the moment these Rules and Codes are in draft format needing to be given a solid working over by knowledgeable and experienced people to ensure they are realistic and manageable.

The initial aim is to have Pararafting events that are open to as wide a group of people with disabilities as possible so as to be inclusive as possible. Being a team sport we have the advantage to be able to offer this. And as this develops we would then develop a section that would be the one to lead us to pararafting in the Olympics.

Respectfully yours,
